

CONFIDENTIAL

[Redacted]

19 July 1948

25X1

Assistant Director for Operations

Admonition

1. On 7 July 1948 at 6:25 P.M., Safe #1512 containing secret material, Room 201, Briggs School Building, was found unlocked. Adequate and proper investigation places the responsibility for this security violation on you.

2. It is pointed out that security violations are the result of carelessness, negligence or direct and willful violation of proper orders. There is no evidence in this case which indicates deliberate effort on your part to permit the possible disclosure of secret material to unauthorized personnel. There is, however, every indication of your disregard for the security regulations established by the Central Intelligence Agency. You have already been charged with a security violation on 16 March 1948. Your carelessness in leaving a safe, containing secret material, unlocked and unattended, constitutes a serious offense against national security. Such unexcusable negligence on your part will not be tolerated again.

3. You are hereby administratively admonished and warned that severe disciplinary action will be taken if you are found guilty of additional security violations.
